The course outline will open. You can view the NOT MASTERED Lessons by click on the tab.

You can also see how many times the assessment was taken. If your student has not mastered the assessment after the 2<sup>nd</sup> attempt, print the test and have them complete it on paper, then go online to enter answers. If it was still not mastered after this 3<sup>rd</sup> try, email or text me so I can reset the test.

Use the paper copy to mark the incorrect answers for your child and help your student review the content for the types of questions missed. Email me, if needed, for extra resources.
